**Re:** February 2022 Staff Report

**Recreation Division** –Winter Senior Games wrapped up on 2/28 with a total of 138 participants. Things went smoothly except for weather-related cancellations. We had some equipment failures in the Aquatics area that will be addressed this upcoming budget. Pool hours have now been expanded to include day-time hours on Tuesday and Thursdays which has been well-received. After we have some time for the public to adapt to these changes, we will review usage to determine if there are some hours where closures are warranted mid-day based on participation. Aquatics continues to host monthly lifeguard classes and the number of lifeguard applicants has begun to increase. This will hopefully enable a well-planned and robust summer schedule with fun activities added to the schedule. Adult basketball began the season without referees, due to a lack of applicants. We have now successfully hired three referees to complete the season and tournament. Participants know about the shortage and although they would prefer referees, they seem to be willing to adapt their style of play to accommodate this situation. Youth basketball is going well despite numerous staff outages due to illness. Planning is now underway for late spring and summer youth sports. Adventure Kids has continued without issues this season and staff have begun planning for Summer Camp. We anticipate capping registration at 80 children and will again be hosting it at the Ice & Event Center. The Ice season wraps up this coming month with the last day scheduled for the 20<sup>th</sup> of March. Turnstiles are now functioning as intended at the Recreation Center, enabling a more accurate daily count of users. On Saturday, February 19<sup>th</sup> we had a total participation count of over 900 individuals. In past years those who were in the facility for a reservation or a registered activity were not in our daily count. This is approximately 200-300 individuals more than those who purchased a day pass or used their membership for access.
