

2022 Code Administration/Building Division Annual Report

The Code Administration/Building Division is responsible for the plan review and permitting of all vertical construction within the City of Laramie’s municipal boundaries. This includes both new construction and the remodel of residential, commercial as well as all mechanical, electrical, and plumbing trades. The Code Administration/Building Division also facilitates all contractor licensing and renewals for individuals and construction or trade related business operating in Laramie. The Code Administration/Building Division also hosts the Environmental Health inspector who reviews and inspects all new and existing food and body art establishments.

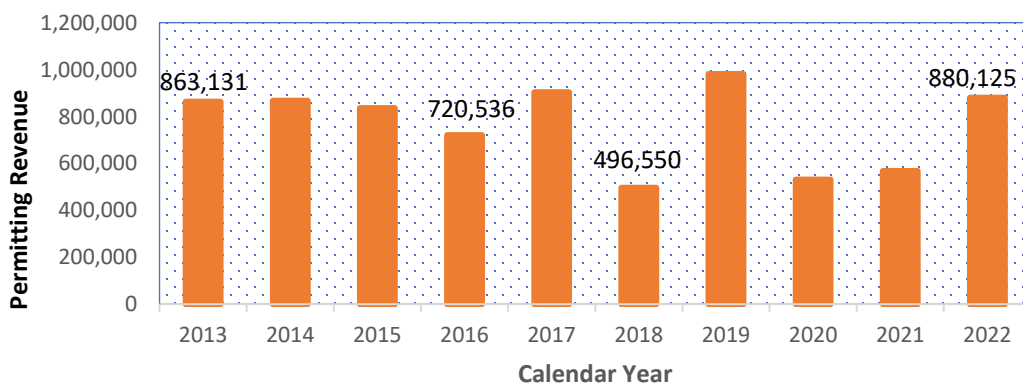

The Code Administration/Building Division operates under the most recently adopted International Building Code Series requirements. All construction activities are reviewed and inspected by those standards and local code amendments which accommodate our climate and conditions.

The 2022 Code Administration/Building Division Annual Report encompasses data from 10 years of development and construction activity within the City of Laramie. The last 10 years have realized some peaks and valleys in the number of permits issued and the related revenue generated. 2022 ended the year with 1,072 permits issued and 176 plan reviews. Plan review and permit fees generating revenue of \$880,125.18, a 35% increase over 2021.

The plan review and permitting fee schedule has remained unchanged over the last several years. The plan review fees, building permit and electrical fees automatically adjust for inflation as they are based on project valuation. Mechanical and plumbing fees are based on specific items in addition to a base fee.

Contractor and individual licensing generated \$65,915.00. in revenue for new and renewal licenses for the 2022 calendar year. A total of 339 contracting or trade related business and 750 individuals renewed or obtained new licenses for 2022.

The revenue generated in the Building Department is self-sustaining and the revenue is centrally budgeted as a general government account.

Total permits issued 2013: 1169 - 2013 Revenue \$863,131

Total permits issued 2022: 1072 - 2021 Revenue \$880,125
